

Emma J Lomman: web designer and developer

Resume of Emma J Lomman

What I do

Web design and development

I design and build websites using XHTML/CSS, PHP/MySQL or a range of content management systems (CMS). I also create CMS and web themes.

Digital art

I get nervous and twitchy when it's all work and no play, so in my spare time I like to play with my design software. The results have really started to mount up, so I'm currently developing an online gallery to showcase and variously sell and give away my efforts.

Current skills

My current skills include:

- web design and development
- web project management and documentation
- XHTML/CSS
- PHP, MySQL and JavaScript
- web project testing and quality assurance

Emma J Lomman: web designer and developer

My qualifications

2010: Advanced Diploma of Screen and Media

Undertaken at Tasmanian Polytechnic.

Development of The Edge Element gallery, marketing and business planning for a freelance web design business
